Punggol Digital District

Envisioned to be Singapore's first smart district, Punggol Digital District (PDD) is where game-changing firms in fields such as cybersecurity, blockchain and robotics can thrive.

The 50-hectare district drives the adoption of cutting-edge urban solutions, pushes the boundaries of digital technologies, and brings together communities in a green and sustainable environment.

Expect a host of innovative firsts at PDD. This includes the cutting-edge Open Digital Platform (ODP) that makes live data of the district easily available.

The ODP integrates various smart technologies such as facilities management, security, and autonomous goods delivery systems, thereby optimising energy and resource efficiency in the district.
