## **Annex A: Train Pod @ one-north factsheet**

### **From Decommissioned MRT Train to Sustainable Boutique Hotel**

All high-res photos are available [here](#), to be credited to Tiny Pod Pte Ltd.

Train Pod is housed in a Kawasaki-Nippon Sharyo C751B (KNS) train car. This model served as the third generation of trains for the North-South and East-West Lines from 2000 to 2024.

Tiny Pod engaged a Cometto trailer accompanied by an auxiliary police escort to transport the train car from SMRT Tuas Depot to JTC's LaunchPad @ one-north. On site, two heavy duty cranes were used to lift the train car into position. Approximately \$300,000 and 8 months of work were devoted to refurbishing the decommissioned train car.

Besides the carriage, other parts of the train have also been reused. The train seats have been converted to park benches, and the original interior has been largely conserved. The driver's seat and a large part of the control panel have also been retained.

### **Rooms and Features**

Train Pod features 8 hotel ensuite rooms in a single train car. Each room comes with Murphy single bunk beds accommodating 2 guests. The rooms are fully air-conditioned and come equipped with WiFi and Netflix.

Other amenities offered onsite include:

- Food and drinks vending machines
- Washing machine & dryer (coin operated)
- Outdoor kitchen for light cooking
- Fridge/Freezer

Train Pod @ one-north will be open for bookings in the second half of 2025. Visit <https://www.tinypod.com/train-pod> or Tiny Pod's social media platforms for information and updates.
